

Product End-of-Life Notification Letter

To: All Schneider Electric Motion Customers

Date: April 15, 2020

Affected Products: All Legacy MDrivePlus Ethernet-based Products

Effective Date: June 30, 2020

Device Identification:

All legacy MDrivePlus Ethernet-based integrated rotary and linear motors including standard, Hybrid (Accustep), and custom. Also, MDrivePlus Ethernet Gateway products. A comprehensive product part number list is included at the end of this notification letter, however, not every affected part number is detailed. Please direct specific part number inquiries to your Regional Sales Manager.

Description & Purpose:

New CyberSecurity requirements put into law from “US California Senate Bill No. 327 Information Privacy: Connected Devices” impact all legacy MDrivePlus Ethernet-based products, which has resulted in the decision to discontinue them.

Recommended Action:

Please review any applications where you may be using one of the affected products. Again, a comprehensive product part number list is included at the end of this notification letter, however, not every affected part number is detailed. Please direct specific part number inquiries to your Regional Sales Manager. They can assist you by providing answers and, in many cases, recommending replacement products.

Customers have the opportunity to place significant last-time-buys (LTB). However, SEM is unable to deliver product shipments after June 30, 2020 due to the new CyberSecurity Law now in effect, and the non-conformance of these specific products to that law.

Thank you for your continued support and please do not hesitate to contact us with any additional questions.

Sincerely,

Eric Klein
General Manager
